- Standard 9V battery or plug-top PSU versions

- Portable or fixed

- Wall mount bracket included

- Flexible configuration options making it ideal for many applications

- Re-legendable buttons

- Messages programmable with PC app

Wave Track 4

The four button Wave-Track is ideal for many applications where members of staff need to be alerted using pre-formatted messages.

 Each button on the wipe-clean keypad can be configured to transmit a pre-stored message of up to 21 characters. The keypad buttons also feature blank label areas which can be written on with a marker pen, making it ideal for shift workers or temporary event use.

 Multiple Wave-Track's can be used on a site, each sending its own unique Identifier and text messages to the receiving devices, which could be pagers, fixed receivers or a combination of both. When configured to operate with fixed telemetry receivers (such as the Scope RX10) the Wavetrack can also be used as a remote control device.

 This makes Wave-Track 4 incredibly versatile and suitable for a huge variety of applications, especially within the Hospitality, Retail and other customer service industries.
